

<b>Grade Descriptions</b>	
C2	Traditional, middle choice, default grade with an edge towards toughness.
C2/C3	Sometimes called "Middle C" or "Big Joe". A modern, advanced grade that is tougher than the traditional C2 with better wear than the traditional C3.
C3	Traditional, middle choice, default grade with an edge towards better wear
NC	Super Tough Nail Cutting grade. Excellent for abusive applications such as Flooring Removal, Pallet Mills, Beetle Killed Lumber and similar.
Super C	A modern, advanced grade. Sub-Micron with a high binder content. The toughness of a C-1 with the wear properties of a C-3 or maybe a C-4 depending on the application. An excellent sawmill grade. Often used as a general-purpose retipping grade.
